

You will come through the front door

You will register with Emily at the desk.

You will be taken through the door

This is where you will have your test.

The grownup with you will use a long stick called a swab to tickle your throat. You will need to open your mouth wide but it won't hurt.

The grownup with you will gently put the swab up your nose.  
It might tickle but it won't hurt.

When you have finished you will go out of this door.
