

## Using Skills Builder as part of the Careers Programme

### [The Skills Builder Partnership](#)

The Skills Builder Universal Framework has been used to design a programme to help five new apprentices, who are working towards a Level 3 Apprenticeship in Business Administration, to explore their essential skills and pass their end point assessment. Across a series of three online workshops, apprentices will explore how they use their ...

This Programme been developed by the Career Development Institute in collaboration with many other bodies and industry.

Short information video. <https://www.skillsbuilder.org/about-the-hub>

The programme was officially launched in 2019 and works alongside the Gatsby Benchmarks. There is an expanded framework specifically for Special Schools.

It revolves around developing the skills of students in small recognised steps in eight key areas.

Each area works through a series of steps building skills and developing universal language to understand the terms and their meaning /relevance to them as individuals and the world they live in and share with others.

These eight essential skills areas have been identified as key for future learning and employment and are recognised in Schools Colleges and the work place. Each of the eight areas has its own passport which can be used to plot students' journey.
